

YUTTANA PATI

UX/UI DESIGNER & DESIGN SYSTEM LEAD

📍 Bangkok, Thailand | 📞 097-173-3443 | ✉️ phatiyuttana@gmail.com

🎨 Portfolio: figma.com/@phatiyuttana | 💼 LinkedIn: linkedin.com/in/yuttana-phati

SUMMARY

UX/UI Designer & Design System Lead with 3+ years in Enterprise SaaS and IoT platforms. Built scalable Design Systems that cut design-to-dev revision rounds from 4 to 1–2, and helped close 3 Enterprise deals through design-led product differentiation. CS background lets me collaborate in engineering language — and ship systems that hold up at scale.

FEATURED PROJECTS

🏗️ Custom Dashboard (Enterprise SaaS Platform) — Swift Dynamics

CM Sitearound — Led end-to-end UX/UI redesign of a construction management SaaS platform and rebuilt the Design System from Ant Design to shadcn/ui + Tailwind CSS. Designed role-based Custom Dashboards with widget customization — a feature-led sales driver that helped close 3 Enterprise deals with Ananda Development, Gulf Energy, and CHPP.

- Role: UX/UI Designer & Design System Lead · Stack: Figma, React, shadcn/ui, Tailwind CSS, Apache ECharts, Design Tokens

🏛️ Government Unified Status Dashboard — Swift Dynamics

Designed an accessibility-first dashboard for a government client, serving users across varying levels of technical literacy. Achieved a 30% improvement in task completion rate during usability testing.

- Role: UX/UI Designer & Design System Lead · Stack: Figma, shadcn/ui, Tailwind CSS, Design Tokens

📊 IoT Sensor Monitoring Dashboard — Swift Dynamics

Translated raw sensor data into a real-time monitoring interface for industrial operators. Focused on anomaly detection and information hierarchy under high data density.

- Role: UX/UI Designer & Design System Lead · Stack: Figma, React, Apache ECharts, Design Tokens

WORK EXPERIENCE

UX/UI Designer, Swift Dynamics Co., Ltd.

Nov 2022 – Present

Product Architecture & Design Systems

- Led end-to-end UX/UI design for a construction and facility management platform, taking it from paper-based workflows to a fully digital ecosystem used across web and mobile.
- Built and maintained a centralized Design System with Figma Variables, Tokens, and Auto-layout — reducing design-to-dev revision rounds from ~4 to 1–2 per feature and keeping UI consistent across 5+ product modules.
- Integrated AI tools (Claude, Gemini) into the design workflow for research synthesis, first-draft user flows, and documentation — cutting the discovery phase on new features from ~2 weeks to 8–9 days.

Data-Driven IoT & Custom Dashboards

- Designed monitoring dashboards for industrial IoT sensor data using Apache ECharts, helping operations teams identify system anomalies roughly 40% faster during pilot testing.
- Partnered with frontend engineers to spec and review component behavior in React, Ant Design, and Tailwind CSS — making sure dense data views stayed performant and didn't break under real sensor load.

Stakeholder Collaboration & Government Solutions

- Ran requirement-gathering sessions directly with Product Owners and Project Managers, translating high-level business goals into user flows and high-fidelity wireframes for large-scale government projects.
- Designed a unified status-tracking dashboard for a government client, prioritizing accessibility and plain-language UI for users across age groups and technical literacy — achieving a 30% lift in task completion rate during usability testing (n=12).
- Presented design decisions and trade-offs to cross-functional stakeholders (PM, PO, engineering leads, client representatives) on a weekly basis.

UI Designer, Yes Web Design Studio Co., Ltd.

Apr 2022 – Aug 2022

- Designed high-fidelity UI for 3+ WordPress websites in Figma, customizing ThemeForest templates to match each client's brand and content needs.
- Built reusable component libraries and site maps that cut design time on follow-up projects, while keeping visual consistency across the studio's deliverables.

UI Designer (Internship), Online Asset Co., Ltd.

Nov 2021 – Mar 2022

- Designed the full mobile UI for DR.in (medical app) in Adobe XD — from wireframes to high-fidelity prototypes — and shipped responsive front-end pages for SUSCO.co.th using HTML, CSS, and JavaScript.

SKILLS & TOOLS

Design Strategy: Scalable Design Systems (Tokens/Variables), Information Architecture, Service Blueprinting, Product Roadmap Alignment

UX Research: Usability Testing, User Persona Mapping, User Flows, Site Maps, A/B Testing

Development: React, Ant Design, shadcn/ui, Tailwind CSS, Apache ECharts, Design-to-Code Handover

AI Productivity: Claude, Gemini, ChatGPT, Google Stitch — for research synthesis, prompt engineering, and rapid prototyping

Design Tools: Figma (Advanced), FigJam, Adobe XD

Collaboration: Jira, Miro, Slack

EDUCATION

Bachelor of Science, Computer Science, University of Phayao

2017 – 2022

- Senior Project: Developed a responsive Camera Rental Web Application end-to-end, covering UX/UI design, technical documentation (ERD & flowcharts), and full-stack implementation using PHP and MySQL.
