

YUTTANA PATI

UX/UI DESIGNER & DESIGN SYSTEM LEAD

📍 Bangkok, Thailand | ✉️ phatiyuttana@gmail.com

👤 Portfolio: <https://yuttana-portfolio.vercel.app/> | 🛒 LinkedIn: [linkedin.com/in/yuttana-phati](https://www.linkedin.com/in/yuttana-phati)

SUMMARY

UX/UI Designer & Design System Lead with 3+ years in Enterprise SaaS and IoT platforms. Built scalable Design Systems that cut design-to-dev revision rounds from 4 to 1-2, and helped close 3 Enterprise deals through design-led product differentiation. CS background lets me collaborate in engineering language and ship systems that hold up at scale. Highly proficient in integrating AI tools to accelerate design workflows and rapid prototyping for competitive project bidding.

WORK EXPERIENCE

UX/UI Designer, Swift Dynamics Co., Ltd.

Nov 2022 – Present

Key Projects & Impact

- **CM Sitearound (Enterprise SaaS Platform):** Led end-to-end UX/UI redesign of a construction management platform and rebuilt the Design System from Ant Design to shadcn/ui + Tailwind CSS. Designed role-based Custom Dashboards with widget customization — a feature-led sales driver that helped close 3 Enterprise deals with Ananda Development, Gulf Energy, and CHPP.
- **Project Proposal (TOR Bidding):** Utilized AI prompt engineering (Claude, Gemini, Google Stitch) to rapidly translate complex Terms of Reference (TOR) requirements into high-fidelity UI concepts. This accelerated prototyping process provided a competitive edge, boosting the technical score and directly contributing to winning the bid for a major large-scale project.
- **Government Unified Status Dashboard:** Designed an accessibility-first dashboard for a government client, serving users across varying levels of technical literacy. Achieved a 30% improvement in task completion rate during usability testing (n=12).

Data-Driven IoT & Custom Dashboards

- **Design Systems & Workflow:** Built and maintained a centralized Design System with Figma Variables, Tokens, and Auto-layout — reducing design-to-dev revision rounds from ~4 to 1-2 per feature and keeping UI consistent across 5+ product modules. Integrated AI tools into the workflow, cutting the discovery phase on new features from ~2 weeks to 8-9 days.
- **Data-Driven IoT Dashboards:** Designed monitoring dashboards using Apache ECharts, helping operations teams identify system anomalies roughly 40% faster during pilot testing. Partnered with frontend engineers to spec component behavior in React and Tailwind CSS, ensuring dense data views stayed performant under real sensor load.
- **Stakeholder Collaboration:** Ran requirement-gathering sessions directly with Product Owners and Project Managers, translating high-level business goals into user flows and wireframes. Presented design decisions and trade-offs to cross-functional stakeholders on a weekly basis.

UX/UI Designer, Yes Web Design Studio Co., Ltd.

Apr 2022 – Aug 2022

- Designed high-fidelity UI for 3+ WordPress websites in Figma, customizing ThemeForest templates to each client's brand identity and project requirements.
- Built wireframes and interactive prototypes to walk stakeholders through user flows, keeping everyone aligned before development began.

UI Designer (Internship), Online Asset Co., Ltd.

Nov 2021 – Mar 2022

- Designed the mobile UI for DR.in for Doctor in Adobe XD, taking it from wireframes to high-fidelity prototypes.
- Designed web UI in Adobe XD and built the responsive front-end for SUSCO.co.th's financial pages with HTML, CSS and JavaScript.
- Wrote a UX case study of the MorPrompt app — analysing user pain points and redesigning the UI to make it easier to use.

EDUCATION

Bachelor of Science, Computer Science, University of Phayao

Jun 2020 – Oct 2021

- Senior Project — Rental Camera Service Website: Developed a responsive Camera Rental Web Application end-to-end, covering UX/UI design, technical documentation (ERD & flowcharts), and full-stack implementation using PHP and MySQL.

SKILLS & TOOLS

Design Strategy: Scalable Design Systems (Tokens/Variables), Information Architecture, Service Blueprinting, Product Roadmap Alignment

UX Research: Usability Testing, User Persona Mapping, User Flows, Site Maps, A/B Testing

Development: React, Ant Design, shadcn/ui, Tailwind CSS, Apache ECharts, Design-to-Code Handover

AI Productivity: Claude, Claude Code, Gemini, Codex, ChatGPT, Google Stitch for research synthesis, prompt engineering, and rapid prototyping

Design Tools: Figma (Advanced), FigJam, Adobe XD
